2023 BIL ANNUAL AWARDS

# THE POWER OF HOPE AND OPTIMISM

by John Dennis

In most countries and regions around the world we find ourselves entering a new phase of post-pandemic growth, where the time for fear, worry, and caution which have been holding us all back, seem to now be a thing of the past. Governments and some businesses alike are for the most part, starting to make moves in the right direction at last, and we need to be doing the same thing to be able to ride on the crest of that post pandemic wave.

I can understand why our Bomanite Licensed Partners may until now have been holding back. When a business operates in a cautious manner and holds back, they are holding out on hope; but to be successful it needs to be one or the other; you cannot be

cautious and hopeful at the same time. I ask you all to consider now that the time is right to start moving forward once again with optimism. Try to feel for yourself... OPTIMISM feels good – CAUTION does not. It is a lot easier to believe in your team, the industry, the pedigree and history that being a Bomanite licensee offers and the value of your work; and to move forward with hope and optimism. Some of you may think of this as being unrealistic, but the unrealistic part is the stop/start mixed momentum and the aggravation that it brings. We need to focus instead on solutions, not problems; focus on inspiration and new ideas - progress does after all, revolve around innovation and insight; so let everyone now commit to keep our momentum moving ever forward!

I am pleased to announce that Chris Sullivan will once again be working with BIL as Sales Consultant in order to help increase the business development efforts aimed at growing the number of BIL Licensees worldwide. Please do let us know if you know of any potential leads for any level of License. 😊

***"It is a lot easier to believe in your team, the industry, the pedigree and history that being a Bomanite licensee offers and the value of your work; and to move forward with hope and optimism"***

There is a new line up of informative and helpful online forums that will be announced shortly, if you have your own ideas for such online forums please do pass those along to us (those of you who already did so, many thanks for that). We

worldwide. We received many excellent entries and the judging (75% by your fellow Licensees for the first time) was very close and the well deserving winners are announced elsewhere in this Impressions Newsletter.

also have exciting plans for arranging attendance as a group at WOC next year in Las Vegas for those interested to attend that event, details for that will come out in due course. To all of those who submitted your various Projects for the BIL 2023 Awards, thank you very much, I am forever encouraged by the various types and high level of our applications

Lastly, if you anticipate needing any help of any kind or support, please do reach out to myself or Rommel.

We wish everyone a successful year filled with many strong performances and enjoyment along the way!

ANNUAL

AWARDS

Recognizing the remarkable  
accomplishments of our outstanding  
Bomanite licensees

# 2023 BIL ANNUAL AWARD ENTRIES

## **THE SHANGHAI ROAD UNDERPASS ART CONCRETE PAVING**

Beijing Orangestone Hardscape Co Ltd

Shanghai Road underground repairs include pedestrian passage upgrades. After the underpass renovation, the extremely childlike concrete mosaic pavers with artistic lighting design preserved the practicality of more trendy taste. It decreases neighborhood traffic, eases walking, and creates a public leisure place with shops, food, and entertainment.

## **RETAINING WALL AND GARAGE ENTRANCE AND FAÇADE DECORATION**

Beijing Orangestone Hardscape Co Ltd

Fragrant Hill Park, a royal mountain and woodland garden in Beijing's western suburbs, covers 188 hectares of hazardous terrain and rich foliage. Thus, protecting northwest green tourism ecology is a priority. Hence, to create a harmonious landscape, architectural design should be modest, dignified, and devoid of excess.

## **D-PARK BEIJING FASHION DESIGN PLAZA**

Beijing Orangestone Hardscape Co Ltd

The renovation of Beijing 751D-Park turns the "Industrial Rust Belt" into a creative space full of fashion elements by digging into the deep connotation of industrial heritage and turning the old abandoned factories, plants, and facilities into a "City Show Stage" with Exposed Aggregate systems.

## **THE MANOR CENTRAL PARK SQUARE**

Bomanite Vietnam Company Limited

The design of the project includes a square with pebble wash, a stage with colored concrete, and terrazzo seating. In contrast to stamped concrete, the construction of flat-colored concrete is always problematic. It takes lots of work to master the art of color management.

## **STARLAKE RESIDENTIAL**

Bomanite Vietnam Company Limited

The completion of this stunning stamped concrete structure in Hanoi, Vietnam, came in surprisingly little time. With construction taking place during the wet season, pouring concrete and applying sealer proved impossible. The team had to move quickly during the short time of daylight.

## **NB01 ROAD - SONASEA**

Bomanite Vietnam Company Limited

This spectacular stamped and broom-finished concrete leads to the breathtaking seas of Van Don Beach, which is located in the province of Quang Ninh in Vietnam. Especially when viewed from above, the exquisite array of hues that alternate with one another creates a stunning scene.

## **MARINA HARBOR**

Bomanite Vietnam Company Limited

The pebble wash and terrazzo project that was carried out in a sea observatory in Hanoi, Vietnam, turned out to be quite beautiful. The development in the reclaimed area caused a great deal of surface cracking and variations. However, the genuine expertise of the highly qualified employees overcame all of these obstacles.

## **DRAGON GOLF COURSE**

Bomanite Vietnam Company Limited

The Dragon Golf Course is located in the Dragon Ocean Do Son International Tourist Area of Hai Phong Province in Vietnam, this 8,500 sqm project is a mix of stamped concrete of 15cm and pebble wash of 2 cm

## **MANILA ZOO (GFRC)**

Bomanite Southeast Asia

This GFRC precast installation simulates bamboo using a combination of customized yellow-based color hardener and stains to create the natural bamboo finish covering most of the animal enclosures, fences, and gates in Manila Zoo, Philippines.

## **SKY SUITES TOWER**

Bomanite Southeast Asia

The Sky Suites Tower is a 55-story luxury building in Quezon City, Philippines. It is a polished concrete installation that mixes both polishable overlay and regular polished concrete finishes. The polished concrete used Coquina color hardener and was polished to a cream finish with minimal sand and aggregate exposure.

## **PRADERA**

Bomanite Southeast Asia

Pradera Verde means Green Meadows in Spanish. The Pradera Verde Theme Park project design concept is a mix of past, present, and future and blends local Filipino culture, history, and geography. It used 10 various imprinted patterns with a mix of customized and standard Bomanite patterns for the park development.

## **GUANG MING COLLEGE**

PAUL TROPICAL

The wet season in Cavite, Philippines, posed a difficulty to this gorgeous stamped concrete installation. However, the end result is a lovely boardwalk pattern made up of four 1ft x 4ft panels with an autumn brown hardener and a light brown release agent.

## **3 RESIDENCE, PENANG**

Bomanite Malaysia Sdn Bhd

This opulent development in Penang, Malaysia, comprises two towers with 36 floors of condo units. Bomanite was utilized in the hardscapes of all 46 corridor levels of the 2 towers, the driveway, the garden gym on the ground floor, and the swimming pool deck on level 6.

## **ATAS EHIR**

Bomanite Turkiye

Epoxy aggregate was utilized as part of the "Atasehir Municipality's Pedestrian Road Renovation Project," which covered an area of 5500 square meters and was designed to revitalize the stunning walkways of Istanbul, Turkey.

## **ANTALYA GYPSOPHILA CLUB MARINE**

Bomanite Turkiye

Following the successful completion of the pool deck project in 2018, the sister hotel of Gypsophila Hotel commissioned Bomanite Turkey to once again install the same exposed aggregate in their second hotel located in Antalya.

## LUXURY POOL BAR NL

Indocrete

This sophisticated swimming pool design complements the high-end homes in Solo Baru City, which is located in Central Java, Indonesia. utilizing both terrazzo and stamped concrete systems

## LRT PEDESTRIAN JAKARTA

Indocrete

Over 30,000 square meters of pedestrian and LRT station flooring in Jakarta's capital city have been laid by Indocrete, using Bomanite color hardener in cobblestone gray and sheal gray to create a beautiful aesthetic.

## LUXURY COLOMADU HOUSING

Indocrete

A lovely city that has kept the Javanese culture, Surakarta (today known as Solo City) is home to the luxurious Colimadu Housing. An aesthetically pleasing combination of vegetation, modern minimalism, and polished concrete. This mansion has a salt and pepper theme throughout all of its levels.

## GATE LUXURY HOUSING

Indocrete

Cobblestone pattern, Montecarlo Color Hardener, and Shale Gray Release agent were employed in this stamped concrete project in affluent Malang City. The end result is a combination of practicality and beauty.

## LUXURY RESORT KAROSO SAMBA ISLAND

Indocrete

Cap Karoso is an Indonesian luxury hotel project. Indocrete decorates the bedroom, courtyard, beach view, organic gardens, and hotel restaurant in traditional Sumba style with wood and string chairs, bamboo lights, and concrete polish.

## LUXURY NATA AZANA HOTEL

Indocrete

This industrial design used concrete, terrazzo, and wood. The hotel's polished concrete floors, rooms, hallways, and pool area match the theme of natural concrete, and the embellishments on the floors and walls are attractive.

## QUITO DENTAL CLINIC

Bomanite Ecuador

This chic microcement installation spans 1,200 square meters located in a dental office in Quito, Ecuador's bustling metropolis. It has a thick gray bottom, a gray microcement, and a glossy polyurethane sealer in addition to a fiberglass mesh.

## PROJECT #2

Bomanite Ecuador

This stamped concrete project was developed in Amaguaña, a sector of many haciendas located in the region of Pichincha, Ecuador. The application was done with a square stone mold, gray hardener color, dark gray release agent, and polyurethane sealer.

## URBAN REGENERATION

Bomanite Ecuador

A striking 4,000 square meters of stamped concrete with paprika-colored quartz, clay tile release agent, and glossy polyurethane sealer stamping thick joints in gray was installed in the province of Morona Santiago in Ecuador.

WELL DONE!!!

CONGRATULATIONS  
TO ALL  
NOMINEES

FOR YOUR CRAFTSMANSHIP,  
CREATIVITY AND INNOVATION

**1ST PLACE GOLD AWARD**

# **THE SHANGHAI ROAD UNDERPASS ART CONCRETE PAVING**

Beijing Orangestone Hardscape Co Ltd

This stunning concrete mosaic paver in Dalian, Liaoning Province, is the first of its kind. Curves clash in blue-purple. Sand-washing art pavers and concrete mosaic art pavers are colorful, anti-slip, durable, and complement the city's maritime theme. It decreases neighborhood traffic, eases walking, and creates a public leisure place with shops, food, and entertainment.

Shanghai Road underground repairs include pedestrian passage upgrades. After the underpass renovation, the incredibly childish concrete mosaic pavers with beautiful lighting design kept the practicality of more modern taste.

**2ND PLACE  
SILVER AWARD**

## **3 RESIDENCE, PENANG**

Bomanite Malaysia Sdn Bhd

The 3-Residence is located south of Penang Island and consists of upscale condominiums, residential properties, and a 2.3-kilometer promenade. Bomanite was utilized in the hardscapes of all 46 corridor levels, as well as the driveway, garden gym, and swimming pool deck of the two towers.

**3RD PLACE  
BRONZE AWARD**

## **MANILA ZOO (GFRC)**

Bomanite Southeast Asia

Most of the animal enclosures, fences, and gates at the Manila Zoo, Philippines, are made of GFRC precast, with a natural bamboo finish achieved through the use of silicon molds and casted natural bamboo, along with a combination of custom yellow-based color hardener and stains.

# WOW AWARD

## ATAS EHIR

Bomanite Turkiye

Located in Istanbul, Turkey, the Atasehir Municipality's pedestrian road renovation project resulted in a beautiful installation of 5,500 square meters of epoxy aggregate despite the challenges of the winter season and the accidents of street animals and people strolling into set concrete.

## NEW COMER AWARD

## URBAN REGENERATION

Bomanite Ecuador
