Bay Green IC	Mist Green IC	Cool Mauve IC	Sierra Rose IC	Ledgestone CH	Painted Desert CH	Garden Slate CH	Chargreen CH	Baltic Green CH	Steel Blue CH
									
Coal Gray IC	Gunmetal Gray IC	Seal Gray IC	Castle Gray IC	Mossrock CH	French Gray CH	Nickel Gray CH	Shale Gray CH	Natural Gray CH	Cobblestone Gray CH

*NOTE: Color swatches on this chart approximate as close as possible the final appearance of colored concrete. Variations can be expected due to the job conditions, finishing techniques, exposure of aggregates, use of sealers or coatings, curing methods and raw material drifts. Certain combinations of products and/or colors may produce dramatically different than anticipated color appearances. It is strongly advised that a sample be produced prior to installation of any product.

Use this color chart to make color selections for the following products:

PRODUCT NAME	SPECIAL CONSIDERATIONS
Bomanite Color Hardener	Available in all colors shown. Integral Color (IC) designated colors may require minimum orders, contact your local Bomanite Franchise Partner for color availability. Prices are typically higher for blues and greens.
Bomanite Color Hardener - Heavy Duty	Available in all colors shown. Minimum orders may be required, contact your Bomanite Franchise Partner for color availability. Prices are typically higher for blues and greens.
Bomanite Integral Color	Available in all colors shown. Color Hardener (CH) designated colors may require minimum orders, contact your local Bomanite Franchise Partner for color availability. Prices are typically higher for blues and greens. Note: Some Color Hardener (CH) designated colors may require the use of white cement.
Bomanite Release Agent	Available in all colors shown. Integral Color (IC) designated colors may require minimum orders, contact your local Bomanite Franchise Partner for color availability. Prices are typically higher for blues and greens.
Thin-Set by Bomanite	Prices are typically higher for blues and greens.
Micro-Top by Bomanite	Colors depicted require no special considerations.
Micro-Top XT by Bomanite	Available in most colors shown, contact your local Bomanite Franchise Partner for color availability.
Bomanite Precast Products	Available in all colors shown. Prices are typically higher for blues and greens.
Aggretext by Bomanite	Available in all colors shown. Prices are typically higher for blues and greens. Note: The aggregate exposed in the finished product has a pronounced effect on the final color.
Bomanite Liquid Tint Packs	Water and solvent-based sealers can be tinted in all colors shown.
Bomanite Con-Color	Colors depicted require no special considerations.
Bomanite Topical Stain	Colors depicted require no special considerations.
Bomanite Color Cure	Colors depicted require no special considerations.
Bomanite V-Imprint	Available in all colors shown. Minimum orders may be required, contact your Bomanite Franchise Partner for color availability. Prices are typically higher for blues and greens.

IMPORTANT NOTES

This chart represents the products in an unsealed form. There is no colored curing agent used to achieve these colors and any topically applied sealers or coatings will affect the final appearance. Sampling or mockups provided through your local Bomanite Franchise Partner is strongly recommended prior to final color selection.

Release Agent is intended as a surface highlighting product only, and will not match the color chart exactly. Certain combinations of Color Hardener and Release Agents can produce dramatically different color appearances than anticipated due to pigment interaction.

When selecting Bomanite Integral Color, variations can be expected due to variations in raw materials within the concrete itself such as cement, sand and water content. Additionally mixes replacing a portion of the Portland Cement with recycled content may greatly affect final appearances. Consistency of color of cement and aggregates as well as the content of the concrete mix design is critical in achieving uniform color from batch to batch. 4" to 5" slumps are recommended. Higher slumps should be achieved by using water reducing or plasticizing admixtures, NOT by adding water. The addition of extra water to the mix will affect the uniformity of the color. Uneven curing and/or rapid drying of the concrete will also affect the uniformity of the color.

Custom colors are available for all products listed with adequate notice, contact your local Bomanite Franchise Partner or Bomanite Corporation for information on custom color selections. Utilize a Pantone guide or provide a solid color for matching purposes.
